

In our services

Meet & Greet

Flying gets more and more complicated by the day: long queues, long waits and having to drag luggage or deal with airport staff takes away from our time and can

put our health at risk.

With the VIP Meet & Greet service, our aim is to offer you a different flight experience so you can make the most of your time and avoid waiting around inside a plane and being in contact with other passengers. We've been offering the Meet & Greet service for quite some time at all the world's major airports.

Why waste time queueing if there's a specialized company that can do it for you? Order your favourite meal or magazines, and we'll make sure the check-in, bag drop and luggage collection processes are a mere formality you don't even need to think about. Or you can arrive just in time for your flight. We'll make sure everything is ready for you.

When we travel, we just want to get there as soon as possible and settle into that work meeting or get home to the family. Our service offers you the chance to forget about all the hassle. As soon as you touch down, we take care of the rest. A car will whisk you away to your destination. We'll take care of arranging a private security and passport check with the authorities. Once you've arrived, we'll send your luggage straight home, so you don't have to wait around. All done in the best cars with the best service.

Order our services with top of the range vehicles like Class S, Mercedes V, Maybach or our fleet of Range Rovers.
